

Mathematics

Meet the Leader

Mr Atkins - Assistant Head, Maths Lead and Year 6 Teacher

I have been teaching here at Crossflatts since 2014 and, over the years, I have worked across KS2. I have always loved teaching maths and have enjoyed the way it can be applied to so many real life contexts. I studied the subject as part of my degree, particularly statistics, so being able to lead it across the school means that I can share this passion for the subject and the links between maths and the wider world. I believe that the logic,

Our Vision

We see the skills of mathematics as being an important discipline for our children to enjoy, thrive and succeed in. Our aim is for our children to develop a love of maths, through encouraging a growth mindset within the subject, which in turn will help to develop an inner belief that they can achieve highly in the subject. We wish for our children to have a love and confidence in the subject and be able to independently apply their ability to world around them, which is full of mathematical opportunities and patterns. By the time they leave our school, our children will be highly skilled mathematicians, ready to solve problems, spot patterns and apply their knowledge to the world around them and in their future endeavours.

Listen to what our children think on the video below:
