

Mathematics

Meet the Leader

Miss Haughey – Year 3 Teacher – Maths Lead

I have been teaching at Crossflatts Primary School since 2023, although my journey here began earlier when I completed my teacher training at the school.

Maths has always been my favourite subject to teach. I love hearing the different ways children think about and understand mathematics, and seeing the many routes they can take to reach a solution. What excites me most is helping children recognise that maths is all around them, from sharing snacks with friends to planning a journey or managing money, and showing them how the skills they learn in the classroom connect to everyday life. I am passionate about inclusion and firmly believe that every child can succeed and flourish in maths. That is why I have been so excited to play a key role in the development of our Teaching for Mastery approach from the very beginning, helping to create a classroom culture where all children can develop confidence, resilience and a genuine love of mathematics.

At Crossflatts Primary School, we believe every child can succeed in mathematics. Our vision is to develop confident, fluent and articulate mathematicians who are secure in the fundamentals and able to reason, problem-solve and think flexibly. Through our Teaching for Mastery approach, children build a deep and connected understanding of mathematical concepts, creating strong foundations for future learning.

We are committed to an inclusive learning environment where all children feel valued, challenged and supported to achieve their full potential. We want pupils to see mathematics as a powerful tool for understanding the world around them. By fostering curiosity, resilience and a growth mindset, we encourage children to embrace challenge, learn from mistakes and develop confidence in their mathematical thinking. Through this approach, we equip our pupils with the knowledge, skills and confidence to succeed in everyday life and beyond.
