

Science

Mrs Dawson - Year 1 class teacher - Science Lead

I am passionate about nurturing a culture of curiosity where every child feels empowered to explore, question, and discover. At Crossflatts we aim create learning experiences that spark wonder; encourage hands-on investigation, and help pupils flourish as young scientists. We believe that science should be joyful, inclusive, and rooted in real-world understanding which will support them in all aspects of their life.

Our Vision

We believe that a sense of awe, wonder and excitement is at the heart of children's learning. Through engaging and inspiring experiences, children are intrinsically motivated to explore, investigate and make sense of the world around them.

Our children are naturally curious about the natural world and the processes that shape it. They enthusiastically ask questions, make predictions, solve problems and test hypotheses, demonstrating a genuine desire to discover and understand for themselves. This innate curiosity is nurtured through high-quality, thought-provoking teaching that challenges children to think deeply, investigate independently and uncover scientific phenomena through first-hand experiences. By fostering a culture of enquiry, we empower children to become confident, resilient and reflective learners who are excited to explore the world around them.
