Meet the Leader

Miss Senior- Year 5 Teacher and Science Lead

I began my career at Crossflatts as a student teacher in 2006. In 2017, I returned and joined the team as a teacher in KS2.

I developed a passion for science and engineering as a child, becoming an active member of the Association for Science Education at an early age. I thoroughly enjoy watching children discover through hands on, practical activities. At Crossflatts, we actively encourage children to be inquisitive and to ask thought-provoking questions. We take learning outside where possible and offer children first-hand, concrete experiences.

It is a privilege to lead science at Crossflatts Primary School. Working closely with local schools and experts, working in the local community, I am looking forward to inspiring a new generation of scientists!

Our Vision

At Crossflatts, we aim to harness children's natural excitement and curiosity and inspire them to pursue scientific enquiry. Throughout the primary years, children should learn to explain and analyse phenomena, make predictions and solve problems. We aim to nurture a love for the natural world, excitement for future possibilities in science and provide many opportunities for pupils to respond creatively in their learning.
