

Design Technology

Meet the Leader

Mrs Rickaby- Reception Teacher

I have been a member of the Crossflatts family from being an ECT. I began my career in KSI. I believe that Design and Technology contributes significantly to a pupil's 'rounded' development. Design Technology has the ability to be weaved throughout the curriculum. Design technology is a vehicle for children to create products fit for purpose in the areas of form, cooking & nutrition and textiles. I believe Design technology allows the children to develop skills to set them up for everyday life in the future.

Our Vision

As a team we are here to promote the imagination and design skills of all children. We inspire to provide the opportunities for the children to show creativity and resilience in practical ways. At Crossflatts Primary School we recognise the importance of giving all children a DT curriculum that encourages children to be curious, reflective and responsible learners whilst solving problems. Our children leave Crossflatts having learned how products are designed and manufactured, how to be innovative, how to harness the benefits of technology and to make creative use of a variety of resources in order to solve problems in the world around them.

Listen to what our designers think on the video below:
