

Geography.

Meet the Leader

Mrs Smith - Reception teacher

I have been a member of the Crossflatts family for 6 years and was first attracted to the school because of the outstanding physical feature of Dingley Dell. Working with my Reception pupils in the forest area has inspired me to learn more about Geography and boost my own subject knowledge. It is a privilege to lead Geography across school and support teachers in delivering a curriculum which will inspire life-long geographers!

Our Vision

At Crossflatts Primary School teachers are passionate about Geography and bring the subject to life, sharing real life experiences of travel and providing opportunities for pupils to explore the great outdoors in the local area and beyond. Our aim is to ignite curiosity about the world and support pupils in understanding that Geography is intrinsic to our daily lives. Right from the Early Years we open our children's minds to a world beyond Crossflatts and give them opportunities to discover how they can make a positive contribution to the world.

Listen to what our children think on the video below:
